## **Environmental precautions**

Discharge into the environment must be avoided. Prevent further leakage or spillage if safe to do so. Prevent spreading over a wide area (e.g. by containment or oil barriers). Retain and dispose of contaminated wash water.

Local authorities should be advised if significant spillages cannot be contained.

---

## **Methods and materials for containment and cleaning up**

Soak up with inert absorbent material. For large spills, provide diking or other appropriate containment to keep material from spreading. If diked material can be pumped, store recovered material in appropriate container. Clean up remaining materials from spill with suitable absorbent.

Local or national regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup of releases. You will need to determine which regulations are applicable. Sections 13 and 15 of this SDS provide information regarding certain local or national requirements.

---

**Engineering measures** Processing may form hazardous compounds (see section 10).  
  
Ensure adequate ventilation, especially in confined areas. Minimize workplace exposure concentrations.

---

**Personal protective equipment** No personal respiratory protective equipment normally required.  
**Respiratory protection**

---

**Hand protection** Skin should be washed after contact.

---

**Eye protection** Wear the following personal protective equipment  
Safety glasses

---

Skin and body protection      Skin should be washed after contact.

---

Hygiene measures              Ensure that eye flushing systems and safety showers are located close to the working place.  
When using do not eat, drink or smoke.  
Wash contaminated clothing before reuse.  
These precautions are for room temperature handling. Use at elevated temperature or aerosol/spray applications may require added precautions.
